Work Experience

Oct 2018 - Present | **Software Developer at Platterz**

Designed and implemented RESTful APIs in Rails as part of fast-paced Agile software development team for in-market product serving $100K+ revenue per day

Dec 2017 - Oct 2018 | **Media Data Scientist at Klick Health**

Designed, developed, and maintained internal web-apps providing reporting, monitoring and optimization information to the Media team

Developed models to optimize budget allocation on $100MM+ accounts

May 2015 - Nov 2017 | **Technical Cofounder of Two and Thirty Software**

Responsible for product design and development, including shipping complete flagship product

Oversaw outside product development contracts for $60,000 in revenue

Oct 2014 - Apr 2015 | **Software Developer at QRA Corp**

2011 - 2014 | **Teaching Assistant, Dalhousie University**

Lectured on data visualization and data presentation for *Computational Methods in Physics*

Summers 2010 & 2011 | **Research Assistant in the Pierce Lab, Dalhousie University**

Education

Aug 2014 Master of Science in Physics, **Dalhousie University**, Halifax
Thesis: "**Compiling Programs for an Adiabatic Quantum Computer**"
Supervisor: Prof. J. Kyriakidis

May 2011 Bachelor of Science in Physics, **Dalhousie University**, Halifax
First Class Honours, Dean's List, Sexton Scholar

Skills

Data Modelling and Analysis:	sql, scikit-learn, tensorflow, matplotlib, scipy, jupyter
Machine Learning Techniques:	Linear Models, Logistic Regression, SVM, ANN, CNN, Decision Trees, Random Forests
General Programming:	python, c, c++, fortran, c#, Java, Ruby, go, rust
Software & Tools:	Docker, Git, PostgreSQL, Flask, Rails, LabVIEW

Publications

Snow-Kropla, E. J., Pierce, J. R., Westervelt, D. M., and Trivitayanurak, W.: *Cosmic Rays, aerosol formation and cloud-condensation nuclei: sensitivities to model uncertainties,* Atmos. Chem. Phys., 11, 4001-4012, https://doi.org/10.5194/acp-11-4001-2011, 2011.

Outreach

Participated in "Physics Fun and Discovery Days" outreach program for children in Grades 6-12, including:

Planetarium Shows	Used the Halifax Planetarium to show students topics in Astronomy, Astro-Physics and Ancient Mythology
Liquid Nitrogen Shows	Used liquid nitrogen to demonstrate how material properties change at a range of temperature scales including superconductivity, condensing liquid oxygen, and making a salad with a hammer
Discovery Room	Gave students hands-on activities that demonstrate physical principles such as freezing motion with a strobe light, measuring electrical signals of the heart, and acoustics of the voice
